

## NOTES FOR USE OF THE AUTHOR INDEX

Citations give the year/month, not the volume/number.

Citations give the consecutive page number for the entire collection of Boosters (1-203) not the page number of each issue, because many issues had no page numbers.

The page number refers to the first page of the article, not to all pages. An exception is made for some of the extended lists of post offices, where individual page numbers are entered.
